SUMMARY

Full-stack developer with solid experience in creating modern, scalable web applications integrated with physical devices (IoT). With solid knowledge and experience in Next.js, React, Vue, Node.js, Django, and Flask, I am fluent in the entire development cycle — from back-end to user interface. I have delivered robust solutions for brands such as Ambev, Heineken, and Diageo, with a focus on performance, usability, and user experience. I am familiar with distributed environments, embedded systems (Raspberry Pi/Orange Pi), and serverless applications on AWS.

PROFESSIONAL EXPERIENCES

Vello E-commerces

Mid-level full-stack software developer | Sep 2025 - Present • São José dos Campos, SP, Brazil

- Responsible for designing and leading the implementation of a unified API integrating major e-commerce (Shopify, VTEX) and analytics platforms (Google Ads, Google Analytics), reducing integration effort.
- Led the system architecture definition, ensuring scalability, easier onboarding, and faster feature delivery for the dev team.

Skills: Node.js, Nest.js, Supabase, OAuth, n8n, Next.js, React, Shadcn Typescript, Git, GitHub

CYMA DIGITAL

Full-stack software developer | Sep 2024 - Sep 2025 • Jacareí, SP, Brazil

- I led the development of the front-end of the Tailor Made platform, used by over 300 professionals at Ambev. I developed interfaces with React, Tailwind, and TypeScript, integrated with a Django back-end, connecting agencies and internal teams with proven gains in traceability, agility, and reduced rework.
- I actively participated in the implementation of Cyma Display SaaS, a digital signage system with over 200 active devices in the field. I designed reusable components and a modular architecture, facilitating maintenance and scalability of the system in Next.js and Node.js. I reduced the load on the database with caching and improved the player's embedded interface in Vue.js, ensuring stable performance even with low connectivity.
- I developed the complete stack (front and back) of interactive kiosk applications, with Vue.js + Flask, optimized for high-traffic environments and integrated with Google Analytics, providing strategic engagement data to the marketing team.

Front-end Software Development Intern | Jul 2023 - Sep 2024 • Jacareí, SP, Brazil

- I delivered an offline-first interaction collection system for kiosks with automatic submission to Google Analytics, using TypeScript, Python, and Shell Script. The solution ensured data continuity even without a constant connection, improving the quality of marketing reports.
- I developed and maintained interactive applications in Vue.js for Heineken POS terminals, focusing on responsiveness and a fluid experience on devices with limited resources, strengthening engagement at the point of sale.

Skills: Typescript, React, Next.js, Vue.js, Tailwind, Shadcn, Bootstrap, Node.js, Python, Flask, Django, AWS, Vercel, Cypress, Jest, Testes Unitários, Testes E2E, Redis Cache, Google Analytics, Figma, WebSocket, API Rest, Express, MySQL, PostgreSQL, Linux, RaspberryPi, OrangePi, Arduino, Git, GitHub, Kanban, Scum, Docker, Docker Compose, n8n

IFSP Jacareí - SIRE.EDU

Project Researcher | Apr 2023 - Dec 2023 • Jacareí, SP, Brazil

- I modernized the SIRE.EDU educational system by rewriting the entire legacy front-end (Aurelia) to a modern architecture with React and TypeScript, resulting in significant improvements in user experience and code maintenance.
- I managed the update and implementation of the system in production, ensuring significant improvements in usability and performance.

Skills: Django, Python, React, Typescript, Git, GitHub

EDUCATION

Instituto Federal de Educação, Ciência e Tecnologia de São Paulo - IFSP

Associate Degree in System Analysis and Development · (2022 - 2024)

ETEC - Escola Técnica Estadual de São Paulo

High School Diploma with Technical Qualification in Web Development · (2019 - 2021)

LANGUAGES

English

Full professional proficiency

Portuguese

Native

VOLUNTEERING
